講義題目 授業の目標概要		Introduction to Security Studies This is an introductory course to the field of security studies. It provides an overview of the major theories and concepts in security studies. Also, it covers history, development and the future of national and international security. In this course, you will consider questions such as: Why is war a persistent feature of international relations? What factors make it more likely that states will resolve their differences and avoid war? How have weapons of mass destruction changed the practice of international relations? And what are the prospects for national and international security in the future?As a result of completing this course, you will be able to:- Develop an understanding of the main concepts and terminology in security studies.-Know the history, evolution and current aspects of national and international security.-Understand and analyze modern security challenges.-Be able to identify current trends in security studies.-Compare and assess the different causes of internal and international military conflicts.-Consider pathways to interstate peace.

講義題目 授業の目標概要		Global governance in International Society The concept of global governance has increasingly been important for last decades. We have observed emergence of an international society where states, international organizations and non-state actors attempted to address global problems and issues. This course provides an overview of concepts, processes and outcomes of global governance. The course is divided into three parts. The first introduces the current global governance structure, core concepts and theoretical perspectives on global governance. The second part focuses on actors in global governance: international and regional organizations and non-state actors, and examines how they play roles for global governance. The third part deals with issues in global governance ranging from security, economic to social aspects. The course addresses diverse empirical cases, and analyzes how and why processes differ across different issue areas. As a wrap-up session, we will discuss effectiveness of global governance incorporating concepts such as power, authority and legitimacy.				
成績評価方法 教科書 ガイダンス		participation (40%), final exam (60%) 教科書は使用しない。／Will not use textbook 特に行わない。／Will not conduct guidance

講義題目 授業の目標概要		Introduction to Earth System Law and Governance In light of the potential far-reaching epistemological, ontological, ethical and normative implications of the Anthropocene, this course examines the complex, multi-scalar law and governance challenges arising from within an Earth System. Through interactive lectures, classroom discussions based upon pre-assigned readings, case studies and the elaboration of a joint mini-project, students: 1) reflect from the critical perspective on the possibility to develop an intra-, inter- and trans-disciplinary analytical framework to better understand and respond to the legal dimensions of earth system governance; 2) discuss which normative foundations could help govern the full spectrum of Earth System relationships in a way that promotes planetary justice; and 3) examine which legal means could facilitate transformative earth system governance for long-term sustainability.				
成績評価方法 教科書 ガイダンス		Active participation in group/classroom discussions: 30%.Three 600-word write-ups: 30%.Final mini-project (organization of a roundtable + individual 1200- word essay): 40%. 教科書は使用しない。／Will not use textbook 特に行わない。／Will not conduct guidance
